- **Project Name:** Shoppez

Empathy Map Canvas

An empathy map captures knowledge about a user’s behaviors and attitudes to help the team better understand them.

Target User Persona: Retail Customer (Shopper) & Admin Manager

Quadrant	What the User Thinks and Feels	What the User Hears
SAY & DO	• Wants to check out quickly without friction. • Looks for clear product lists and pricing. • Clicks directly on demo credentials during testing.	• "Make sure your online payment is secure!" • "I prefer clean, simple light-themed designs."
THINK & FEEL	• Fears entering card details on unsafe forms. • Appreciates micro-animations (like card flipping). • Wants real-time order status confirmations.	• "Many e-commerce sites feel cluttered and slow." • Friends recommending quick e-shops.
SEE	• Clean product grids with high-quality images. • Visual card graphics rendering dynamically. • Interactive dashboard stats reflecting store sales.	• Standard modern minimalist e-commerce web layouts. • Instant feedback notices (green success alerts).
PAIN & GAIN	• Pain: White text conflicts, server downtime, complex database setups. • Gain: Local DB fallback ensures the site is always interactive.	• Pain: White-on-white text issues on admin insights. • Gain: Real-time sales insights in black text.
