Problem – Solution Fit Template

The Problem-Solution Fit ensures that you have identified a clear user problem and that the solution you have designed actually solves it.

Target Group: Online E-Commerce Customers & Site Admins

Customer Problem	Designed Solution	Fit Justification
Friction during payment (Shopper has anxiety entering credit card details).	Animated Credit Card checkout UI displaying dynamic visual card layout.	Card details input is instantly visualized on card mockup, providing reassurance and lowering friction.
Database failures (MongoDB cluster goes offline causing app crash).	Automatic fallback system that loads from local JSON files if database is down.	App remains fully interactive and functional even during database server outages.
Unreadable sales stats (Admin stats labels text-color matches background).	Updated all dashboard panel labels to black text for visibility.	Admin managers can immediately view sales insights and charts without highlighting the text.
Security risks (Demo user and admin credentials shown on login page).	Removed default "demo admin" and "demo customer" autofill buttons.	Prevents unauthorized visitors from gaining instant admin access to product prices and order lists.
